**Description of Problem**

Please include a detailed description of the issues, as well as a description of and a copy of any professional studies, citations or reports from government entities, recommended solutions, and any cost information or estimates. If additional space is needed, please attach.

We need to update our water system. Water storage tank is too small for needs of the school. We are constantly blowing well pump and pressure pump fuses due to constant running of pumps trying to keep up. When fuses blow, well pump does not run to fill storage tank. What water there is in tank gets used completely and then the whole system shuts down. Water storage tank is way too small for restroom and cafeteria use. We have not been able to water grass fields for quite a few years due to pumps and water storage. We are quite sure the well needs to be drilled deeper because we are pumping up lots of dirt. The well was put in some time back in the 60's. Not sure of the depth. Maybe only 400 to 600 ft. We have just been lucky to this point that with some of the pump failures we have had that we have not had to send everyone home...yet!!!

**Project Category:** Special Systems

**Are any of the above-described issues in buildings or part of buildings that are leased to another entity, including a district sponsored charter school?** N

**Available Funding**

Current unencumbered building renewal fund balance (Fund 690):	\$0.00
Amount of Local funds planned for this project	\$0.00

Please outline any associated insurance coverage.

NA.
